

## Release notes for MailXServer 4.7b

Before you start the update ensure that the Linux system is updated with the newest patches.

To update the system run the following from the Linux console as root:

Redhat: `up2date -u`  
CentOS: `yum update`

A new minor release of MailXServer is available for online update. The following updates are made:

- **GUI Security Audit Trail**

**System** ⇨ **Security Audit Log**

All activity in the MailXServer web administration console will be logged to a database.

### View Security Audit Log

The security audit log contains a log of all Web frontend activity.

Total Records: 924

Records: 1 to 100 ▶
